Magnafloc® 333

Nonionic flocculant

Description
Magnafloc 333 is a very high molecular weight nonionic polyacrylamide flocculant supplied as a granular powder.

Principal uses
Magnafloc 333 has found application in a wide variety of mineral processing operations including the following:

1. Acid leach CCD (uranium)
2. Acid leach CCD (copper)
3. Sedimentation of jarosite precipitate in electrolytic zinc processes
4. Clarification of zinc electrolyte
5. Flocculation of copper tailings
6. China clay flocculation
7. Base metal sulphide and oxide concentrates thickening and filtration
8. Carbonate leach CCD (uranium)
9. Potash slimes clarification
10. Phosphoric acid clarification
11. Iron ore tailings clarification
12. Pregnant liquor clarification (gold)

Typical properties
- Physical form: White to off-white free flowing powder
- Particle size: 98% < 850 μm
- Bulk density: Approx. 0.75 g/cm³
- pH of 1% solution at 25 °C: Approx. 7.0
- Viscosity at 25 °C: See graph and table
Application

Recommended solution concentrations:

- Stock solution: 0.25–0.5% max.
- Feed solution: 0.025–0.1% max.

Storage & Shelf life

Magnafloc 333 is at least stable for four years from date of manufacture in its unopened original packaging stored in a cool and dry place.

- Stock solution: 1–2 days

Details on preparation and application can be obtained from a BASF representative.

Solution viscosity data
(Fann viscometer – 25°C – solvent – deionised water)

Shipping & Handling

Magnafloc 333 is available in 25 kg bags and big bags.

Corrosivity towards most standard materials of construction is low, but aluminium and galvanised equipment should be avoided.

Technical service

Advice and assistance in the running of laboratory and plant tests to select the correct product and determine the best application can be provided by representatives of BASF, who are experienced in mineral processing applications.

Health & Safety

Please refer to the Safety Data Sheet for detailed information concerning product’s hazards and appropriate protective measures in the workplace.
Note

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose.
